

Paint Recycling Program

Hingham Lumber has partnered with Recolor, a professional recycling company that collects leftover paint and produces a 100% recycled paint product using these post-consumer materials.

We accept latex, water-based or acrylic paint (check for soap and water clean up) for recycling. All paint must be received in its original container specifying type, intended application (e.g. interior) and gloss level and must visually match labelled content. Bulked paint or FROZEN paint will NOT be accepted.

If your latex (water-based) paint is not recyclable, you can dry it out with a commercial paint hardener (we carry Krud Kutter, just \$2.99 to harden 2-3 gallons), kitty litter, sawdust or shredded paper. Once the latex paint is no longer liquid, it can be disposed of with your household trash.

Recolor Accepts

- ◆ All latex or water based paint e.g. water clean up
- ◆ Must be in original, labeled container
- ◆ Must be in liquid form
- ◆ Not be older than 10 years
